1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: the filing date of the priority document is different in the declaration than given in the application data sheet. The examiner notes that applicant filed an application data sheet to correct the priority claim in the declaration. Though applicant may make a priority claim in an application data sheet, to avoid any possible confusion, the other references to said claim in the file should not be in conflict with such a claim. The examiner thus requires a new declaration with the correction.

2. The following is an examiner's statement of reasons for allowance: the examiner accepts applicant's arguments in the paper filed 11 May 2005 that the use of "m" instead of " μ " was a typographical error that would have been readily apparent to one of ordinary skill in the art at the time of filing. The examiner also agrees with applicant's arguments in the same paper that the load displacement characteristic in combination

with the other limitations of independent claim 1 distinguish over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
